FOREWORD BY PRIME MINISTER

HON. PETER O'NEILL **CMG, MP**

After 40 years of Independence; we have not realized the visions of the founding fathers of this great nation and that is to improve the lives of our people on many fronts, including education, health care, quality infrastructure development, employment creation and so forth compared to other countries who had a similar socio-economic status as we did 40 years ago like Malaysia.

One of our biggest set-back has been, the inability of Papua New Guinea to grow and diversify the small and medium sized enterprise (SME) Sector over the last 40 years, as this would have been the catalyst for sustainable economic growth and wealth creation for our people. The focus and reliance on the extractive sector is unsustainable, and needs to change, to secure a prosperous future for our country.

This SME Master Plan is developed to achieve and deliver the objectives as highlighted in the SME Policy, and assist in encouraging more of our people to start and grow more and more Papua New Guinea-owned, operated and managed companies in the formal sector. The planned SME sector growth will contribute to our overall economic growth, create more employment opportunities, pay more taxes and contribute towards improving the overall quality of life for all Papua New Guineans.

The SME Master Plan is built on a genuine desire to reverse the current imbalances and unequal distribution of wealth and business opportunities for our citizens. The approach and focus will be on outcomes and effective delivery and implementation of the Master Plan. Going forward, development of SMEs will not rest solely in the hands of the Government, but will be the responsibility of both the Government and the private sector through a mutually beneficial and reinforcing public-private partnership programs.

The Government is committed to providing necessary reforms, investment, institutional capacity building and competent leadership to facilitate the implementation of the SME Master Plan 2016-2030.

We have began to introduce - and will undertake - more legislative reforms including bringing back a business reserve list for our citizens to enhance economic empowerment among our people. We will also introduce a foreign investment legislation to allow only those foreign investors who meet our national interest test to come and do business in PNG, unlike today where the SME Sector is crowded out by foreigners, thereby leaving inadequate incubation space for PNG SMEs.

I assure all stakeholders and constituents, especially our people in the informal and formal SME sector and potential businessmen and women including our youth, that my Government is committed and will provide funding and other support necessary to give our country, and our people, a fighting chance against economic imbalance and poverty. Under my leadership of the SME Council, will provide policy oversight, to grow the formal sector, and to secure a prosperous future for our people and our beloved country.

I call on all our citizens to rise up and take advantage of the many emerging business opportunities, with the support and empowerment of our Government through legislative reforms, low interest rate loans from NDB, more roads, improved communication and other infrastructure so that the SME Sector can grow and contribute towards achieving our National goals of being a middle-income country by 2030 and a high-income country by 2050 as called for in PNG Vision 2050.

I call on all stakeholders and constituents—including our public service machinery and the Indigenous Business Council—to get behind and support the implementation of this SME Master Plan for the benefit of our people and our motherland, Papua New Guinea, now and in the many years ahead. We can do this, and indeed we must by building a strong, robust, sustainable and fair and inclusive economy, so Papua New Guinea can become a Smart, Wise, Fair, Happy, Healthy & Wealthy society by 2050.

Peter O'Neill

HON. PETER O'NEILL, CMG, MP

Prime Minister and

Chairman of the SME Council of Papua New Guinea

ADDRESS BY
MINISTER OF TRADE COMMERCE AND INDUSTRY

HON. RICHARD MARU

BTECH, MBA, OBE, MP

The SME Master Plan 2016–2030 has the specific target of increasing the number of SMEs in Papua New Guinea from an estimated 49,500 to 500,000 by 2030. This is a very challenging target, but one we must pursue vigorously because of the multifaceted economic development challenges our country faces. Achieving 500,000 SMEs by 2030 will require a lot of targeted investment, dedication, effort and unflinching support from all key stakeholders. This will happen under the able leadership of our Prime Minister, who will chair the SME Council as the highest policy oversight body to implement the SME Master Plan 2016 – 2030

Achieving such a target will result in the creation of 2 million new jobs, in the formal sector, thereby increasing SME-Sector contribution to our GDP to 50 percent. Such an increase will significantly reduce our current population under the poverty line to less than 30 percent from the current 40 percent. The Master Plan has defined targets for each theme that this SME Master Plan must reach by 2030. Every Province and each district must develop their SME Policies and a Master Plan that must be aligned to the National SME Master Plan 2016–2030.

The new SME Corporation will oversee the implementation of this Master Plan, which will be a game changer for our country when successfully implemented. Implementing the plan will require the efforts and co-operation of the Government led by our Prime Minister who is Chairman of the SME Council, as well as the support of all stakeholders and constituents in the SME Sector. Most significantly, it will include the involvement of our people to succeed in this noble undertaking.

The Government will provide the legislative framework and funding to grow the Sector but it is up to our people to rise up and take up the opportunities and challenges and innovate as businessmen and women. We cannot continue to be spectators in our own land. Rather, we must be the dominant force in our development going forward.

From 2016 onwards, our collective challenge as a nation, is to find and support 450,000 Papua New Guineans start up new businesses including taking over from many foreign owned businesses which operate in the reserved business space which only Papua New Guinean citizens can own and operate under our SME Policy 2016. This will be mandatory by legislation that our Government will enact. We will need over K3 Billion over the next 5 years as seed capital to fund Papua New Guineans take up business opportunities, as a career option.

We thank the Government led by our Prime Minister, all Ministers, Members of Parliament, the SME National Steering Committee, the Secretary for the Department of Trade, Commerce & Industry, our Consultants (Esee Consult), the NDB, SBDC Board and Management and all those that provided input and support for the formulation of this SME Master Plan 2016–2030.

Let us commit and recommit ourselves to making sure that we successfully implement SME Master Plan 2016 –2030 in order to achieve the ambitious targets we set for ourselves in the SME Policy and Master Plan for the benefit of our people, in line with PNG Vision 2050 and our overall development aspirations.

Richard Maru

HON. RICHARD MARU, BTECH, MBA, OBE, MP
Minister for Trade, Commerce & Industry

EXECUTIVE SUMMARY

The development of the SME Policy 2016 and SME Master Plan 2016-2030 is a result of analysis and review by the Government of PNG on the economic growth of this nation against the Vision 2050 and the vision stipulated by the founding founders through the 8 point plan since independence. This analysis shows an improvement yet low socio economic indicators as compared to other countries and a even greater insight is the disposition and perception of Papua New Guineans to the current state of affairs of the Country. We have a fast growing educated population that is dis-engaged and frustrated due to low employment opportunities in the country. The default option of unorganised subsistence farming is not attractive anymore as more and more PNGeans are now looking for more meaningful alternatives. As they become educated, their expectations change to that of one looking for paid employment to improve their lifestyle and the PNG government has never seriously considered how this gap will be bridged in the past and up to present day.

The PNG economy is still largely owned and controlled by outsiders. Ninety percent of the economy in the formal sector is owned by foreign businesses operating in Papua New Guinea at present. This is an issue as most foreign company earnings are remitted out of PNG. To change this scenario, Papua New Guinea Citizens must be supported and encouraged to engage in more then the non-formal sector. They must engage in sizeable investment enterprises. It is proven in many economies around the world that the growth of the SME sector is what has been the back bone of development of these nations. It is with this analysis that the SME strategy is embraced is a key economic growth strategy going forward.

The SME Vision and mission as articulated is to secure sustainable economic growth and contribute to better quality of lives for our citizens;

Vision: The SME sector to be a major contributor towards PNG becoming a middle income country by 2030 and a high income country by 2050.

Mission: To stimulate inclusive and sustainable economic growth resulting in fair and equitable wealth creation, mass formal employment creation and our citizens taking over majority ownership of our economy. The SME sector to be a major contributor towards PNG becoming a middle income country by 2030 and a high income country by 2050.

The key objectives that drives this plan are;

Key Objectives	Measure	Achieved
1. Support and facilitate the growth of SMEs.	<ul style="list-style-type: none"> • Grow SMEs from current 49,500 to 500,000 SMEs. 	2030
2. Create Employment Opportuniles.	<ul style="list-style-type: none"> • Grow from current 291,346 to 2,000,000 jobs. • Reduce current unemployment rate from 84.1% of populalon to 49%. 	2030
3. Ensure a fair and equitable distribulon of our national wealth to PNG cilzens	<ul style="list-style-type: none"> • Citizens to own over 70% of formal economic sector from current 10%. • Increase income per capita of US\$2,000 to US\$9,600. • Reduce current unbankable population of 85.6% to 40%. 	2030
4. Support strong inclusive and sustainable economic growth.	<ul style="list-style-type: none"> • Increase current GDP contribulon of SME from 6% to 50%. • Reduce below the poverty line population rate of 40% to 30%. 	2030

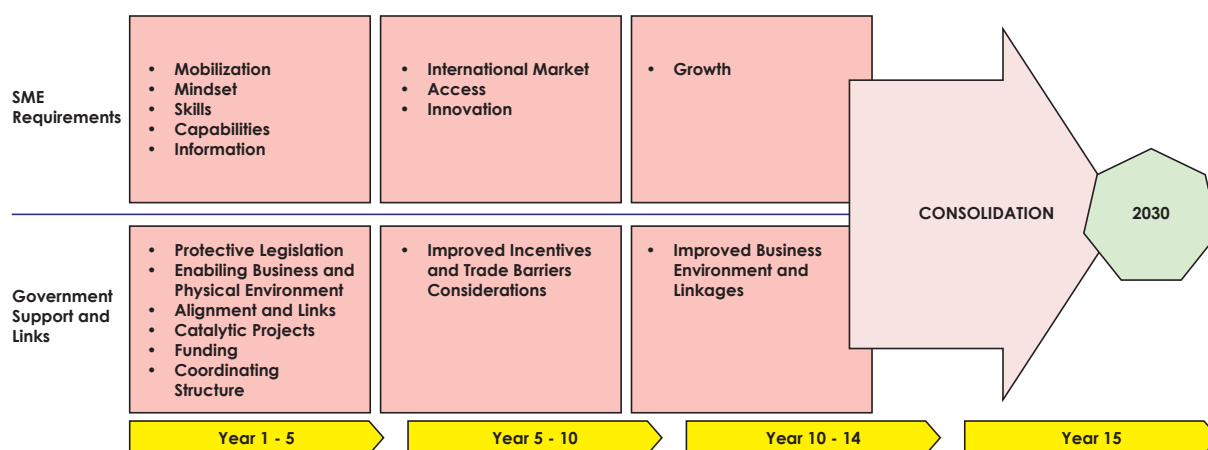

Source; PNG IPA, PNG Vision 2050, SBDC SME census. BPNG.

To drive the delivery of these objectives, it is imperative that the;

- Current business environment must be made condusive to enable SMEs to grow.
- All the constraints as identified must be addressed and the business and the infrastructure enablers are to be in place.
- There is integrated alignment with all industry sectors, and all other stakeholders and partners.
- Each province of PNG must develop critical catalytic economic projects which will create spinoff opportunities for SMEs to engage in and grow. The provincial authorities are to also have aligned and integrated plans with this SME plan to drive its economic development deliverables.
- There is an integrated co-ordinating structure with a robust and real to market monitoring and evaluation process with real time information that ensures the successful implementation of all deliverables.
- The government to provide adequate funding to meet the requirements of the SME Master Plan 2016-2030, especially seed capital of over K3 Billion to fund over 450,000 Papua New Guineans start up their new businesses and grow existing businesses.

The development of SME is the key wealth creation pillar strategy that will deliver sustained economic growth for Papua New Guinea. It is therefore critical that the government of PNG drives this strategy. As depicted in Figure 1; The role of the government for the first 5 years of the plan is to provide the financial support, provide SME protection through an enabling legislation, create a conducive environment for SMEs to develop, creating the linkages with all stakeholders, provide infrastructural development and facilitate the catalytic projects in each province. Due to the stage of SME development in PNG, the first 5 years is focused on building mindset, capacity and the capabilities of that sector. Incubation and protection must be the emphasis of the government and all interested stakeholders in building the SME sector.

Figure 1. SME Development Approach

The approach to SME development in PNG is very similar to other countries when they first embraced the SME agenda. The SME sector can not be developed without basic infrastructure and enablers and a thriving business environment that must exist, therefore all these infrastructure and enablers must be built.

PART 01

BACKGROUND

1.1 Introduction

After 40 years of independence, PNG has not fully gained control of its economy and hence have not been able to fully drive the development agenda of self reliance. The people are not empowered and engaged meaningfully in any economic activities as 40%¹ of its population live below the poverty line. More than 85%² of the population are engaged in subsistence and the non-formal economy whilst 90%³ of the wealth of this nation is controlled by 2%⁴ of large enterprises that are foreign owned. Escalating inflation and falling exchange rates makes it very difficult for the citizens to fully liberate themselves and live dignified lives. This constant marginalisation of the indigenous people have seen a break down of law and order, violence, institutionalised corruption, to name a few and overall a very disoriented, disengaged and discouraged populace.

With an explosion in population growth, and a growing percentage of literate people who expect more than being subsistence based, this poses great threat to stability and growth of this nation. The future looks bleak if the government does not consider serious policy interventions and strategies to address and change this trend. PNG requires a 'game changer' to transform the economy to empower our people, reduce poverty and achieve the goals of Vision 2050. SMEs must assume a greater role in the economy not only as an enabler but also as a key driver of economic growth that is inclusive, balanced and sustainable.

Meeting the Vision 2050 of a high-income nation is a challenging task and a fresh approach is required to accelerate the growth of the SME sector. The aim is to increase the contribution of SMEs to the GDP of PNG. This would necessitate a quantum leap in growth and transformation to higher value-added activities that are knowledge intensive. The SME Policy 2016 and this SME Master Plan 2016-2030 will therefore, be a key 'game changer' in navigating the new development path for SMEs across all sectors. The new strategy will build on existing initiatives for SMEs by strengthening the current framework whilst aligning it to the macro policy reforms.

⁴ SBDC Baseline Survey 2012

1.2 International Perspective on SME Development.

SMEs are drivers of economic growth, job creation, driving innovation and getting social integration. New Zealand, Malaysia, Taiwan, Japan among others are nations that have grown their economy through their focus on SMEs. SME constitutes over 90%⁵ of the enterprises that drive their economies and caters for over 70% of jobs creation. The drive in SMEs has propelled their economies to where it is currently. Figure 2 shows the different ranking these nations have. PNG with no major economic reforms for its population continues to be ranked very low.

Figure 2. Country Ranking by per Capita

Country	Ranking	2012	CAGR% (2000 - 2012)
Luxembourg	1	107, 206	7.5%
Switzerland	4	79, 033	6.5%
Australia	5	67, 723	11.2%
Singapore	10	51, 162	8.2%
United States	11	49, 922	3.0%
Japan	13	46, 736	2.4%
New Zealand	24	38, 222	9.2%
Hong Kong SAR	25	36, 667	4.2%
Taiwan Province of China	39	20, 328	4.2%
Brazil	58	12, 079	14.3%
Malaysia	65	10, 304	9.4%
China	87	6, 076	17.4%
Tonga	99	4, 561	8.4%
Fiji	102	4, 445	6.6%
Vanuata	121	3, 125	8.5%
Indonesia	106	3, 775.8	13.7%
Philippines	127	2, 614	10.1%
Papua New Guinea	130	2, 313	14.4%
Solomon Islands	133	1, 786	9.0%
Kiribati	136	1, 646	6.9%

- PNG is ranked 130 among 184 countries
- 60% of PNG's Population live below the Poverty Line (i.e. \$1.25 - \$2.00 daily)
- From 2000 to 2012 PNG economy grew by 14.4% on the extrative sector growth.

Source: World Economic Outlook, April 2013

Japan is an excellent example of how focus on SMEs has transformed their economy. After World War II, Japan lost all its Industrial facilities by air attacks, it had no major raw materials and also lacked new technology. The Japanese Government established an agency for economic rehabilitation and focused on SMEs and called upon all Japanese to support the coal and steel industries, which were the only two major resources Japan had. The government also selected specific industries like shipyard for exports strengthening.

Source: Japan's Presentation in National Workshop Gateway – Kazuchika Sato. Sept 2013.

This focus was what turned the economy of Japan around. SMEs now accounts for 99.7% of 4.21 million companies, employs over 70% of people and owns 50% of the amount of value- added in the manufacturing industry in Japan. Famous large enterprises like Toyota, Honda and Sony where once small SMEs. Similar economic developments are recorded in Malaysia (as discussed in the Policy), Taiwan, Indonesia and New Zealand due to their focus on SMEs. Most of these countries have focused on renewable sectors, as these are sustainable in the long term. New Zealand built its economy on the back of three major sectors of Tourism, Dairy and Services. The learning's from these countries re-enforces the importance of SMEs and why PNG should focus on developing this sector.

There are arguments that SMEs are not the most cost effective way of driving economic development due to the unstable and vulnerable survival rates of SMEs and the high cost to serve. This rate of failure, however, is changing. There is a trend globally that with the increased access to information and skills and opportunities and enablers to trade, more and more SMEs are starting up and surviving. The US small Business Administration that coordinates the SME development of USA has the following insights, which has been collated since 1980.

“Small business is BIG!

- The 23 million small businesses in America account for 54% of all U.S. sales.
- Small businesses provide 55% of all jobs and 66% of all net new jobs since the 1970s.
- The 600,000 plus franchised small businesses in the U.S. account for 40% of all retail sales and provide jobs for some 8 million people.
- The small business sector in America occupies 30-50% of all commercial space, an estimated 20-34 billion square feet.

Furthermore, the small business sector is growing rapidly. While corporate America has been “downsizing”, the rate of small business “start-ups” has grown, and the rate for small business failures has declined.

- The number of small businesses in the United States has increased by 49% since 1982.
- Since 1990, as big business eliminated 4 million jobs, small businesses added 8 million new jobs.”

This further iterates the importance of driving SMEs as the catalyst for development in PNG.

<http://www.sba.gov/content/small-business-trends>

SMEs development must therefore take centre stage as the government key initiative that will bring back dignity and empower the people of Papua New Guinea.

PART 02

**KEY SME OBJECTIVES
WITH TARGETS
AND DELIVERABLES**

KEY SME OBJECTIVES WITH TARGETS AND DELIVERABLES

The following key objectives that will drive the agenda for SME development in PNG and inturn achieve the desired results and delivers the PNG Vision 2050 are;

Key Objectives	Measure	Time Achieved
1. Support and facilitate the growth of SMEs.	• Grow SMEs from current 49,500 to 500,000 SMEs.	• 2030
2. Employment Creation	• 2,000,000 jobs	• 2030
3. Fair and equitable distribution of our national wealth to PNG citizens	• PNG citizens to own 70% of the formal economic sector activities. • Increase income per capita of US\$2,000 to US\$9,600.	• 2030
4. Support strong inclusive and sustainable economic growth.	• 50% GDP contribution by SMEs.	• 2030

Key Deliverables

The key detailed deliverables that will be achieved as a result of driving SMEs are outlined herein; these deliverables must form the basis of robust tracking and monitoring to ensure they are achieved:

	Current	2030 Target
Number of SMEs	49,500	500,000
Employment Creation	291,346	2,000,000
Ownership of the formal Economy	10%	70%
% Contribution to GDP	6.0%	50%
SME Contribution to GDP (K'mn)	3,262	50,674
Per Capita GDP (K'000)	2.0	9.6
Unemployment	84.1%	49%
Below the Poverty Line	40%	30%
Un Banked	85.6%	40%

Source: PNG IPA, PNG Vision 2050, SBDC SME census

SMEs Provincial Figures and Targets:

Figure 5: Target of SMEs to be reached in each province by 2030;

	Population	Current SMEs	Target SMEs 2030
Western Province	180,455	457	10,905
Gulf	121,128	269	9,126
Central	237,016	671	14,161
NCD	318,128	15,484	63,839
Milne Bay	269,954	812	15,256
Northern	176,206	167	8,504
Southern Highlands	515,511	7,327	38,131
Hela	352,698	520	11,658
Enga	452,596	3,445	25,324
Western Highlands	543,915	1,790	29,404
Jiwaka	150,947	419	8,949
Chimbu	403,772	675	16,159
Eastern Highlands	582,159	547	23,839
Morobe	646,876	7,513	47,152
Madang	487,460	1,034	21,861
East Sepik	433,481	1,992	22,108
West Sepik	227,657	368	11,616
Manus	50,321	1,479	8,310
New Ireland	161,165	1,983	15,001
East New Britain	271,252	1,620	22,036
West New Britain	242,676	927	17,949
Autonomous Region of Bougainville	234,280	0	9,212
Total	7,059,653	49,500	450,500

Due to the lack of adequate SME information and research, the numbers of SMEs in each province quoted above are an estimate derived from combination of IPA Figures and the Baseline survey done by SBDC in 2012.

The targets that are set for each province is ambitious, but it is estimated based on the population growth, the forecasted and planned economic activities for each province. This figures also assumes that all the foundational entrepreneurial training and development and support is implemented as planned.

PART 03

**STRATEGIES FOR SME
DEVELOPMENT IN PNG**

STRATEGIES FOR SME DEVELOPMENT IN PNG

3.1 DEVELOP APPROPRIATE LEGISLATIVE FRAMEWORK TO SUPPORT THE SME SECTOR

Key Initiatives	Time / Budget	Evaluation / Measurement	Responsible Agency
1. A thorough analysis of all economic policy & legislation be done to ensure that there is no conflicting policy and or legislation and rectified where necessary.	• 2016	• Review done and amendments done and approved by SME council and NEC.	SME Corp / Ministry and DCTI / Economic Sectors / IPA / MPs
2. SME Corp to be set up as an organisation as stipulated by the National SME Corporation Act 2014	• 2016	• Implementation of the requirements of the Act.	Ministry of Trade, Commerce & Industry / SME Corp. / DTCL/ MPs
3. To ensure the Trade and Investment legislation is enacted to set up an International Trade Office.	• 2016	• Trade and Investment legislation passed by Parliament.	IPA, Ministry of Commerce, Trade and Industry / DTCL / MPs
4. Foreign Review Investment Board to be set up and enacted as an enabling legislation.	• 2016	• Legislation passed by Parliament.	Ministry of Trade, Commerce & Industry / SME Corp. / DTCL/ MPs
5. New Limited Liability Companies Act. to be enacted.	• 2016	• Legislation passed by Parliament.	Ministry of Trade, Commerce & Industry / SME Corp. / DTCL/ MPs
6. The National Franchise Legislation to be developed and passed by Parliament.	• 2016. • A budget of K100, 000 required	• Passing of Legislation by Parliament.	Ministry of Commerce Trade and Industry. / IPA / SME Corp / NDB / DTCL / MPs

- 1. The Economic Sectors:** The economic sector implementing agencies of the government is an important stakeholder in the development of the SME sector in Papua New Guinea. All plans and policies of economic sector agencies in relation to SME development shall be aligned to the SME Policy 2016 and SME Master Plan 2016- 2030.
- 2. Social Sectors Agencies:** Plans and policies of the social sector agencies in relation to SME development should be aligned to the SME Policy 2016 and SME Master Plan 2016- 2030.
- 3. SMEs:** SMEs shall comply and work together with all Ministries and Agencies including the private sector, Non-Governmental Organization and International Development Partners to enhance their development.
- 4. Non State Actors:** The government shall work in partnership with Non State Actors to deliver some of the SME support services and programs.
- 5. International Development Partners:**
 - o SME related support programs from donor agencies should be coordinated and implemented according to priority programs as identified in the SME Master Plan.
 - o The Government shall encourage development partners to initiate discussions with public and private stakeholders on lessons learned in SME support including opportunities for up-scaling and for pursuing good practices in support service delivery.
- 6. Law and Justice Sector:** The Law and Justice Sector shall work together with the ministry and SMEs to review and address and strengthen law and order.
- 7. Indigenous Business Council (IBC):** IBC will be the recognized voice of SMEs in PNG. IBC centers will be opened in each province to facilitate SME requirements and concerns.
- 8. Other SME Peak Bodies** will also be recognized as voices for the SMEs in our Country, including the National Council of Women, the Women's Chamber etc

3.14.2 SMEs Co-ordinating Structure– Roles and Responsibilities

Figure 8.0 The Co-ordination Structure

Key Initiatives	Time / Budget	Evaluation / Measurement	Responsible Agency
<ol style="list-style-type: none"> 1. To drive the implementation of the SME Policy and Master Plan, the current SBDC organisational Structure to be revamped to reflect the requirements of managing SME. 2. Current public service mindset to be changed to that of a private sector work culture and mindset. 3. Current role of SBDC will change and therefore the SME Corp to adopt the Malaysia model on the roles and responsibilities of its organisation. This to be clearly defined in the restructure. 4. The restructure of the organisation and the alignment of competence of current staff and new recruitment to be completed. 5. Structure for the DTCI will also be changed to reflect the management and strategic ownership of the The National SME policy 2016 and the National SME Master Plan 2016 - 2030. 6. Rebranding of SME Corp to be integrated and effectively communicated through all mediums. 7. The facilitation of the First SME Council meeting to formalise roles and responsibilities of the new SME Corp to be initiated as soon as possible. 8. All stakeholders to be appointed and roles and responsibilities clearly defined. 	<ul style="list-style-type: none"> • 2016 • A budget of K2,000,000 be made available for the restructure of SME Corp. • A budget of K1,000,000 is required. 	<ul style="list-style-type: none"> • The new structure completed • Successful Rebranding the organization. • Meeting structured to effectively drive the outcomes desired for driving the SME sector. 	SBDC, DTCI, SME Council, Minister for Trade, Commerce & Industry

3.14.3 How the structure interfaces with other Stakeholders

Key Initiatives	Time / Budget	Evaluation / Measurement	Responsible Agency
<ol style="list-style-type: none"> 1. To call the first meeting in June 2016 to establish roles and responsibilities and launch the SME Council and the SME Corporation officially. 2. Drive the restructure of SME Corp to be completed with key roles appropriately filled. 3. Appointment of all the heads of the working committees. 4. All roles and responsibilities must be clearly defined and communicated to all stakeholders. 5. Schedules and details of the requirements of the SME Master Plan to be made available to all required stakeholders. 6. The SME Corp to facilitate the formation of the Coordinating Structure for the effective management of the SME Policy and the Master Plan. 	<ul style="list-style-type: none"> • June 2016 	<ul style="list-style-type: none"> • Facilitating the inaugural SME Council meeting. • Clear Roles and responsibilities to be defined. 	SME Corp, DCTI, Minister for Commerce, Trade and Industry, SME Council

3.14.4 Monitoring and Evaluation

Key Initiatives	Time / Budget	Evaluation / Measurement	Responsible Agency
<ol style="list-style-type: none"> 1. A Review documentation by the SME Corporation shall be produced after every 5 years for the National SME Policy and annually for the Master Plan to allow for changes and adjustments. Refer Figure 9 for the Annual Meeting schedule. The March meeting will be a strategic evaluation meeting whilst the November meeting will be the monitoring Meeting. 2. The mechanics of the monitoring and reviewing process as outlines in Figure 9 to be developed and a meeting schedule to be put in place by SME Corp to facilitate this process. 3. Key performance Indicators through a balanced scorecard matrix to be established and confirmed once all reporting processes and systems are finalized. 4. The review will be done quarterly by the SME Corporation Board, An annual report by the SME Council which will form the basis of the Annual report to the SME Corporation to parliament through the NEC. 5. A 5 yearly review and analysis to be done by the Department of National Planning and the Trade, Commerce and Industry. 6. The measurement narrations of this plan describes the measurement process and parameters instead of the indicators as this will be set once a clear where we are now picture is ascertained. 7. A culture of monitoring and evaluation with measureable Key Performance Indicators with clearly articulated Key Result Areas that is tied to job performance must be in place as an HR. process. 	<ul style="list-style-type: none"> • Ongoing Management of the SME Sector 	<ul style="list-style-type: none"> • Effectively Facilitating the Review and monitoring process annually for the Master Plan and every 5 years for the policy review. • Meeting Schedules effectively driving the process and the outcomes required. • KPI's to form part of the Dashboard report that SME Corp and SME Council use to monitor and drive the development of SME in PNG. • Employee performance must be effectively monitored to deliver the planed activities. 	SME Corp, Department of Trade, Commerce and Industry, SME Council

3.15 THE GOVERNMENT TO FACILITATE ADEQUATE FUNDING AND RESOURCING TO GROW THE SME SECTOR IN PNG.

Key Initiatives	Time / Budget	Evaluation / Measurement	Responsible Agency
1. Financial budgetary support must be allocated in the annual National and Provincial budget for the development of SME in PNG.	<ul style="list-style-type: none"> Annual Budgetary Funding 	<ul style="list-style-type: none"> Project based on targets to be achieved for SME in PNG. KPI's put in place to track progress of SME development. 	SME Corp. / Minister for Trade, Commerce and Industry, National Government / Provincial Governments
2. The government must inject more than K1 Billion for the SME sector initiatives especially in facilitating the Reserve Business transactions and so forth			
3. The National Government to provide funding for the development and maintenance of the required infrastructure, catalytic projects and all other enabling requirements and initiatives for the purposes of engaging and empowering its indigenous citizens in SME development and growth.	<ul style="list-style-type: none"> Annual Budgetary Funding 	<ul style="list-style-type: none"> KPI's put in place to track progress of SME development. 	SME Corp. / Minister for Trade, Commerce and Industry, National Government / Provincial Governments.
4. The National Government to establish and fund the required institutions as required to ensure the development and growth of SMEs in PNG is facilitated.	<ul style="list-style-type: none"> Annual Budgetary Funding 	<ul style="list-style-type: none"> KPI's put in place to track progress of SME development. 	SME Corp. / Minister for Trade, Commerce and Industry, National Government

Figure 9: The SME Council Meeting Schedule

PART 04

CONCLUSIONS

4 Conclusion

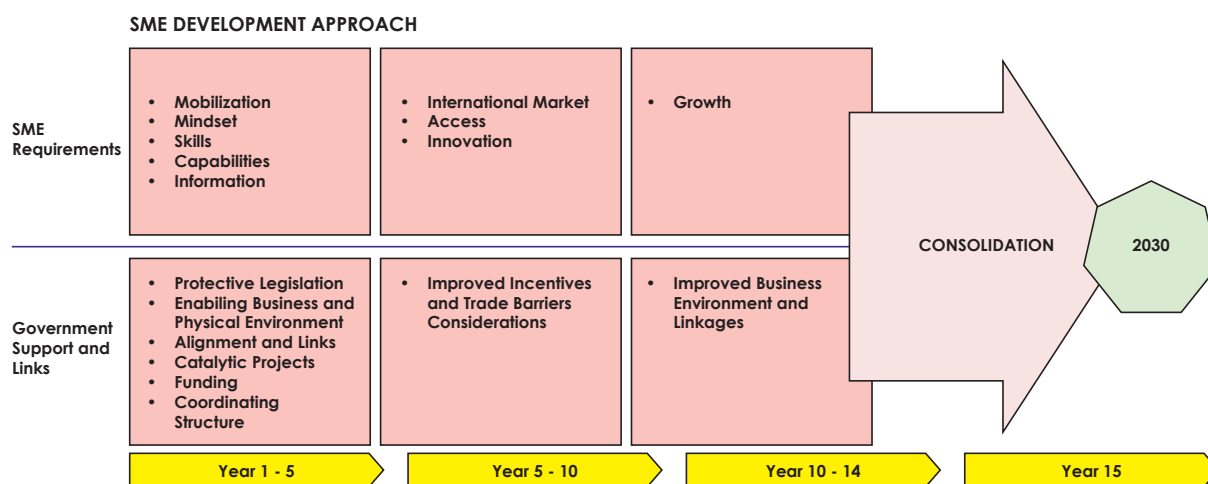

The Approach taken and the priorities for SME development in PNG for the next 5 years is reflective of our current economic and SME development status. As a young developing nation, and the current low levels of SME participation and growth in PNG, the initial stages of development will be focussed on setting the foundational pillars from which will drive the growth and development of SMEs.

The priorities of the SME Policy and the Master Plan is about the government facilitating and creating a conducive environment through focussing on and building;

- Training and Development of SMEs for capacity and competence development
- Protective legislative framework.
- Enabling business environment and physical infrastructures.
- Alignment and linkages for all stakeholders, programs and Coordinating structures and
- Facilitation of Catalytic projects in all provinces to create economic stimulant for SME development.

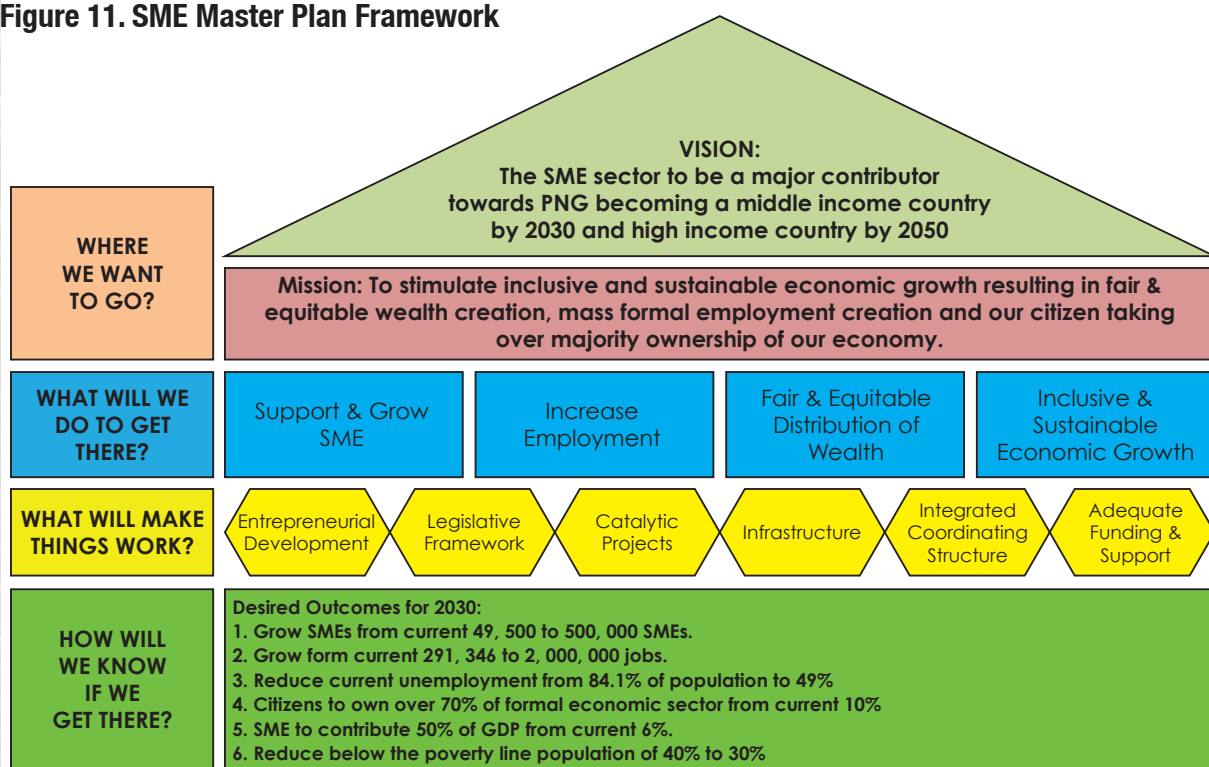

The focus on SMEs will be on building and changing the mindset of the populace to become and be encouraged to become entrepreneurs and for those that are already in the non-formal sector and are displaying entrepreneurial flair, they are to be encouraged to move into more formal business ventures. Figure 1 depicts the focus for the next 16 years. The targets are ambitious but with the right support, aligned and integrated approach and competent delivery mechanism, the targets can be achieved.

Figure 11. SME Development Approach

The Master plan highlights the four objectives the the government would like to achieve through the development and growth of SME as a sector in PNG. Figure 11 illustrates the focus areas of the Master plan and how it is structured. The Master plan covers the initiatives that must be implemented to deliver the outcomes desired by the government. The development of the SME sector is a key strategy in achieving the Wealth creation pillar of the Vision 2050.

Figure 11. SME Master Plan Framework

The development of Papua New Guinea as a nation rests largely on the government's ability to empower its people economically. This is one of the strategic pillars of Vision 2050, where the government has set a strategic aim of wealth creation for PNG. Since the development of Vision 2050, there has been no clear operational direction from the government as to how this strategic aim will materialise. The development of the SME Master plan to a greater extent is the missing link in achieving the strategic pillar of Wealth Creation.

The SME Master plan is very ambitious as it challenges the Vision 2050 of " PNG will be a smart, wise, fair, happy and healthy society." The vision that the SME Master plan aims to achieve in 2030 is for PNG to be a middle income country and by 2050 to be a high-income country. The SME Vision can be measured through the achievement of the four objectives as set out below.

Key Objectives	Target	Time Achieved
1. Support and facilitate the growth of SME.	• Grow SMEs from current 49,500 to 500,000 SMEs.	2030
2. Create Employment Opportunities.	• Grow from current 291,346 to 2,000,000 jobs. • Reduce current unemployment from 84.1% of population to 49%.	2030
3. Ensure a fair and equitable distribution of our national wealth to PNG citizens	• Citizens to own over 70% of formal economic sector from current 10%. • Increase income per capita of US\$2,000 to US\$9,600. • Reduce current unbankable population of 85.6% to 40%.	2030
4. Support strong inclusive and	• Increase current GDP contribution of	2030

Like all other plans there are pre-requisite that must be in place for this plan to be achieved. The key pre-requisites or key enablers as depicted in Figure 10 and highlighted below are;

1. Facilitating entrepreneurial development through a supportive and mentoring program that must be geared to changing mindset building skills and capacity for SMEs.
2. Develop an enabling legislative framework that will enhance and give the protective support mechanism that SMEs require for their development.
3. Development of Catalytic projects in each province must be encouraged, as this will stimulate the growth of SMEs.
4. Both business and physical infrastructure must be built to remove impediments for SME growth.
5. The integrated coordinating structure is key to driving the achievement of the SME objectives.
6. It is imperative that the government must allocate significant financial funding and adequately resource the SME sector and its implementing agencies to facilitate the growth of SMEs.

This SME Master plan is a very operational plan as it sets out all the details of what must be done to achieve the SME Policy objectives and in turn the PNG Vision 2050. This is a two-pronged plan as it drives the strategic intent and at the same time articulates the tactical operational activities that must be delivered. The SME Master plan must be monitored, reviewed and evaluated annually and plans updated to ensure that the strategic objectives for 2030 are kept in focus, given priority and achieved.

APPENDIX 1 | PROVINCIAL CONSULTATIVE WORKSHOP KEY FINDINGS

CONSULTATIVE WORKSHOP FINDINGS - PROVINCES

Provincial consultative workshops highlighted;

- Majority of the 22 provinces reviewed had little to no economic activity except for a central administrative hub for the provincial governments.
- All provincial governments currently are very dependent on Waigani for their annual provincial budgets.
- The major forms of businesses conducted were predominantly retailing and over 95% of them were foreign owned.
- Local Indigenous Papua New Guineans are only engaged in cash crop or subsistence farming. This further re-enforced foreign ownership of businesses in PNG and also clearly shows the disproportionate distribution of wealth amongst Papua New Guineans.
- Existence and or development of basic infrastructure and social care amenities is under developed or has greatly deteriorated which makes it very difficult for every day living. This environment makes it very difficult for any meaningful participation by the people in any forms of economic development, hence the presence of SMEs in most provinces is negligible.

APPENDIX 2 | NATIONAL CONSULTATIVE WORKSHOP KEY FINDINGS

CONSULTATIVE WORKSHOP FINDINGS - NATIONAL

National consultative workshops key highlights;

- No alignment, visibility and coordination of SMEs development across all sectors.
- Lack of funding for economic development programs and institutions.
- SOE's who are the key providers of public utilities do not have reduction of cost of services provided as a priority. NICTA only body driving cost reduction.
- No central point for market information and insights for SMEs.
- Value Add and Down stream processing is underdeveloped in all economic sector.
- Dispersment of levies and landowner funds from sectors like fisheries, forestry are not aggressively geared at building large SMEs but distributes to smaller unsustainable corporative and individuals.
- Commodity Boards are not Integrated and basically concentrate on Research and Development and adequate support in Business development.
- NARI expertise to be partnered by DAL, and other commodity boards etc.
- Clearly defined space for Formal and Non formal given market dynamics, Transition and capacity building strategy to migrate to formal, for those that are more established.
- Approximately 85% of adult population excluded from financial services.
- NDB total lending is K300 million which is about 2.7% of the total lending in PNG of K11 billion.
- Estimated large proportion of SMEs non-compliant with tax obligations.
- Not much incentives to stimulate SME growth.
- Education system concentrates on knowledge and not much investment in skills development. TVET to be given more emphasis.

APPENDIX 3 | IDENTIFIED CONSTRAINTS FACED BY SMES IN PAPUA NEW GUINEA

- Lack of economic activities in provinces to stimulate SME opportunities
- Financial inclusion – 85% of the population are unbankable as access to banking facilities and infrastructure are inadequate. This has exacerbated the lack of savings mentality as people continue to live day by day with no concept of savings or investing for the future.
- Lack of credit and venture capital schemes.
- Lack of Land for Business
- Difficulty in accessing both domestic and International Market.
- Lack of available relevant information and access to right and timely information.
- Entrepreneurial mindset to be developed and enhanced to migrate non formal to formal sector and also to drive engagement in larger sustainable enterprises.
- Lack of physical and business infrastructure.
- Lack of protective and enabling legislation to facilitate the incubation space and period for development and growth.
- High Cost of doing Business

APPENDIX 4 | GUIDING PRINCIPLES

Below are the guiding principles that provided the parameters of guidance for the development of the SME Policy and the Master Plan.

GUIDING PRINCIPLES

1. God is the Head.
2. Fair and Equitable distribution of national wealth and opportunity in the country.
3. Financial Inclusions.
4. Renewal Sectors and sustainable development will be the focus.
5. Gender and Youth focus.
6. Local content.
7. Downstream processing and value adding.
8. Encourage evolution of Entrepreneurial Mindset and development of many entrepreneurs.
9. Empowering Papua New Guineans to take majority ownership of the economy;
 1. Support, Networking and build each other.
 2. Reward and award.
 3. Encouraging and supporting PNG owned Businesses.
10. Develop a savings culture.
11. Identify all key Business enablers and aligned to National Master Plan.
12. Each province to have an SME plan that is aligned to National Master Plan.
13. Alignment to Vision 2050 and must challenge all other plans.
14. Positively discriminate for the betterment of Papua New Guineans citizens.
15. Every province must be financial independent.

APPENDIX 5 | SME DEFINITION MATRIX

4. DEFINITION OF SME IN PNG

4.1 National SME Definition

The definition of Small to Medium Enterprises (SMEs) in Papua New Guinea had been qualitative to date. The economic sector in Papua New Guinea is made up of the non formal and the formal sector and hence it is vital to give a quantitative definition to distinguish one from another and more importantly to have a clear demarcation so as the right kind of support and initiatives by the government is given to the right types of businesses. The non formal sector comprises mainly of small to micro businesses that are not very structured and not formally registered with the Investment Promotion Authority and or the different Provincial Governments and Local Level Governments who also issues licenses to trade in selected business activities.

The quantitative definition looks at the size of the business in terms of number of employees, its gross turnover and the value of its assets. The definition is broken down into sectors due to the intensity of capital and machinery required the revenue capacity and its labor intensiveness to the capacity of revenue generation and capital intensity of the businesses in each sector.

Manufacturing, construction and Engineering:

MANUFACTURING, CONSTRUCTION AND ENGINEERING		
Micro	Small	Medium
<ul style="list-style-type: none">• Sales turnover of less than K200,000• Employees of less than 5• Asset of less than K200,000	<ul style="list-style-type: none">• Sales turnover of more than K200,000 and less than K5mn• Employees of more than 5 and less than 20• Asset of more than K200,000 and less than K10mn	<ul style="list-style-type: none">• Sales turnover of more than K5mn and less than K20mn• Employees of more than 20 and less than 100• Asset of more than K10mn and less than K20mn

The manufacturing, construction and engineering industry are more capital and machinery intensive, and also have a higher revenue earning opportunities hence they have been grouped together, whilst all other sectors are another grouping.

Agriculture, Tourism, Forestry, Fisheries, Services and other Sectors.

AGRICULTURE, TOURISM, FORESTRY, FISHERIES, SERVICE AND OTHER SECTORS		
Micro	Small	Medium
<ul style="list-style-type: none">• Sales turnover of less than K200,000• Employees of less than 5• Asset of less than K200,000	<ul style="list-style-type: none">• Sales turnover of more than K200,000 and less than K5mn• Employees of more than 5 and less than 40• Asset of more than K200,000 and less than K5mn	<ul style="list-style-type: none">• Sales turnover of more than K5mn and less than K10mn• Employees of more than 40 and less than 100• Asset of more than K5mn and less than K10mn

Agriculture, Tourism, Forestry and Fisheries are more labour intensive in Papua New Guinea and therefore the number of employees required will be more than the technology intensive industries and will differ from Manufacturing, construction, and the engineering sectors.

There has been no clear quantitative definition for SMEs in the past, which has led to inconsistent collation of data and understanding of what constitutes an SME. This has made it difficult to develop and grow this sector.

The development and support of SMEs as mentioned in this plan is inclusive of Micro businesses who are officially registered as sole traders with the designated recognised body of government as required.

The matrix for scoring as outlined below;

SME Definition Scoring Matrix

Manufacturing, Construction And Engineering

	Score	Comments
Sales turnover less than K200,000	1	Companies scored between 0 and 3 are classied as MICRO
Employees less than 5	1	
Assets less than K200,000	1	
TOTAL	3	
	Score	Comments
Sales turnover more than K200,000 and less than K5mn	2	Companies scored between 4 and 6 are classied as SMALL
Employees more than 5 and less than 20	2	
Assets more than K200,000 and less than K10mn	2	
TOTAL	6	
	Score	Comments
Sales turnover more than K5mn and less than K20mn	3	Companies scored between 7 and 9 are classied as MEDIUM
Employees more than 20 and less than 100	3	
Assets more than K10mn and less than K20mn	3	
TOTAL	9	

Agriculture, Tourism, Forestry, Fisheries, Services And Other

	Score	Comments
Sales turnover less than K200,000	1	Companies scored between 0 and 3 are classied as MICRO
Employees less than 5	1	
Assets less than K200,000	1	
TOTAL	3	
	Score	Comments
Sales turnover more than K200,000 and less than K5mn	2	Companies scored between 4 and 6 are classied as SMALL
Employees more than 5 and less than 40	2	
Assets more than K200,000 and less than K5mn	2	
TOTAL	6	
	Score	Comments
Sales turnover more than K5mn and less than K10mn	3	Companies scored between 7 and 9 are classied as MEDIUM
Employees more than 40 and less than 100	3	
Assets more than K5mn and less than K10mn	3	
TOTAL	9	

APPENDIX 6 | THE EIGHT POINT PLAN FOR PNG

The 8 point plan for Papua New Guinea aims to encourage;

- A rapid increase in the proportion of the economy under the control of Papua New Guinean individuals and groups, and in the proportion of personal and property income that goes to Papua New Guinea;
- More equal distribution of economic benefits, including movement toward equalization of incomes among people and toward equalization of services among different areas of the country;
- Decentralization of economic activity, planning and government spending, with emphasis on agricultural development, village industry, better internal trade and more spending channeled to local and area bodies;
- An emphasis on smallscale artisan, service and business activity, relying where possible on typically Papua New Guinean forms of economic activity;
- A more self-reliant economy, less dependent for its needs on imported goods and services and better able to meet the needs of its people through local production;
- An increasing capacity for meeting government spending needs from locally raised revenue;
- A rapid increase in the active and equal participation of women in all forms of economic and social activity;
- Government control and involvement in those sectors of the economy where control is necessary to achieve the desired kind of development.

APPENDIX 7 | PROVINCIAL CATALYTIC PROJECTS

A review with each provincial administration has been done during the consultative workshops and each provinces have identified their catalytic projects that must be developed to enable economic participation by Papua New Guineans in Economic activities in these respective provinces. The projects identified are based on the endowment of each province and therefore should give each a competitive advantage in the sectors and opportunities selected. It is crucial that conflicting industries are minimised to encourage growth and optimal use of resources across PNG. The catalytic projects as depicted in Figure 6. must have the necessary infrastructural and business enabling requirements developed for SMEs to emerge and flourish.

Catalytic Projects Per Province

The proposed catalytic projects for all provinces are initiatives in the sustainable sector and this will facilitate the achievement of the objective of “inclusive and sustainable economic Growth”. An integrated approach to development by the identified sector agencies of the government is crucial. The development of these catalytic projects are to be extended right through to value adding and down stream processing manufacture opportunities. This is what will create the economic spin offs business opportunities that will stimulate the growth of the SME sector.

APPENDIX 8 | CURRENT NUMBER OF SMES IN EACH PROVINCE

Current Number of SMEs in each Province

The numbers of SMEs in each province are derived from combination of IPA Nigures and the Baseline survey done by SBDC in 2012.

N/B: Southern Highlands Figures above included Hela & Jiwaka.

APPENDIX 9 | PPROJECTED IMPACT ON SME ON GDP AND INCOME PER CAPITA FOR 2030

	2013	2030	2030	2030	2030
		No action	Land reform	Land reform & LNG	Land reform, LNG & SME
Popn (2011 = 7,059, 653) (mm)	7.4	10.6	10.6	10.6	10.6
GDP (K'bn)	14.5	23.5	33.1	50.7	101.3
